

Yanting Yang

yantingyang@zju.edu | +86 18559799681

EDUCATION

Zhejiang University

09/2022 - Present

Master of Engineering in Software Engineering

Grade Point Average (GPA): 89.71/100

Advised by Prof. Xiaofei He

Wuhan University of Technology

09/2018 - 06/2022

Bachelor of Engineering in Software Engineering

GPA: 91.86/100, Ranking: 11/279

First-Class Scholarship and Outstanding Student

Core Modules: *Data Structures, Computational Composition and Architecture, Operating Systems, etc.*

RESEARCH INTERESTS

My research interests lie in enhancing robots' generalization capabilities to perform effectively across diverse, open-world tasks. Specifically, I focus on leveraging foundation models and large-scale internet data to advance robotic systems in perception, planning, and control. My work has involved adapting video-language model to develop a generalizable reward function. Additionally, I am keen on designing embodied agents that can interact proficiently with the physical world while exhibiting informed reasoning and planning capabilities.

PUBLICATION

Adapt2Reward: Adapting Video-Language Models to Generalizable Robotic Rewards via Failure Prompt

Yanting Yang*, Minghao Chen*, Qibo Qiu, Jiahao Wu, Wenxiao Wang, Binbin Lin, Ziyu Guan, Xiaofei He
European Conference on Computer Vision (ECCV), 2024

AutoManual: Generating Instruction Manuals by LLM Agents via Interactive Environmental Learning

Minghao Chen, Yihang Li, Yanting Yang, Shiyu Yu, Binbin Lin, Xiaofei He
Conference on Neural Information Processing Systems(NIPS), 2024, Under Review

Multimodal Pretraining, Adaptation, and Generation for Recommendation: A Survey

Qijiong Liu, Jieming Zhu, Yanting Yang, Quanyu Dai, Zhaocheng Du, Xiao-Ming Wu, Zhou Zhao, Rui Zhang, Zhenhua Dong
International Conference on Knowledge Discovery and Data Mining (KDD), 2024

Discover: Disentangled Music Representation Learning for Cover Song Identification

Jiahao Xun, Shengyu Zhang, Yanting Yang, Jieming Zhu, Liqun Deng, Zhou Zhao, Zhenhua Dong, Ruiqi Li, Lichao Zhang, Fei Wu
International ACM SIGIR Conference on Research and Development in Information Retrieval (SIGIR), 2023

RESEARCH EXPERIENCE

Research on Foundation Models in Embodied Agent

01/2023 – Present

ZheJiang University

- Explored the generalization capabilities of foundation models, such as Large Language models and Vision-Language models, in embodied agents such as robots. This research focuses on developing generalized reward functions and dynamic, rule-based learning frameworks to enhance their performance across diverse environments and tasks.
- Adapted video-language models with learnable failure prompts to enhance robots' ability to distinguish between successful and failed executions, demonstrating outstanding generalization to new environments and instructions for robot planning and reinforcement learning. Published a paper as the co-first author in ECCV 2024.
- Introduced AutoManual, a framework enabling LLM agents to autonomously adapt and enhance their understanding of diverse environments by categorizing and optimizing knowledge rules online, achieving outstanding performance on ALFWorld benchmarks. Submitted a paper as the third author in NIPS 2024.

Zhejiang University

- Explored the latest advancements and future trajectories in multimodal pretraining, adaptation, and generation techniques, assessing their applications in enhancing recommender systems. Discussed current challenges and opportunities for future research in this dynamic domain. Published a paper as the third author in KDD 2024.
- Introduced DisCover framework for cover song identification, effectively disentangling version-specific and invariant factors using Knowledge-guided and Gradient-based modules, achieving superior performance benchmarks in music information retrieval. Published a paper as the third author in SIGIR 2023.

AWARDS AND HONORS

China Undergraduate Mathematical Contest in Modeling (CUMCM 2020), Province First Prize, 10/2020

China Robotics and Artificial Intelligence Competition, Third Prize, 08/2021

National College Student Information Security Competition, Honorable Mention, 08/2021

The First Prize Scholarship, Wuhan University of Technology

Pacemaker to Merit Student, Wuhan University of Technology

Outstanding Graduates, Wuhan University of Technology

SKILLS

Languages: Java, Python, C/C++, SQL

Simulation Frameworks: Pybullet, Meta-World

Libraries: NumPy, pandas, Matplotlib, Pytorch, TensorFlow, gym

English: IELTS 7.0 (listening: 7.5, reading: 8.5, writing: 6.5, speaking: 6.0)
